

“Elementary!”
A celebration of the 150th anniversary of
Mendeleev’s Periodic Table
by
Stephen H. Ashworth

Lindop Building
College Lane Campus, Hatfield

Wednesday 30 January 2019 at 7.00pm

The periodic table is a tabular arrangement of the chemical elements, ordered by their atomic number, electron configuration, and recurring chemical properties. Stephen's talk will highlight how it came about and how it's grown over the last 150 years.

Dr Stephen H. Ashworth is a Reader in Chemistry at the University of East Anglia, who started dabbling in the “dark arts” of physics last century, during his doctoral studies, and now teaches undergraduate physics in addition to chemistry.
