

Mysteries of the solar system

by
Stuart Eves

**Lindop Building
College Lane Campus, Hatfield**

Wednesday 27 February 2019 at 7.00pm

Since the beginning of the space age in 1957, we have learned an enormous amount about the solar system, but our space probes have also uncovered many things that we simply don't understand. Hence, this talk will focus on what we still DON'T know about our local region of the universe.

Stuart Eves is a fellow of the Royal Astronomical Society and a space systems consultant with more than 30 years' experience.

Joint meeting with the Institute of Measurement and Control
